Title:

Implementation of an online job agency.

Description:

The objective is to implement an online job agency. An online job agency tries to match job seekers with the hiring organizations.

Required functionalities from job seekers:

- The system should provide free information for the job seekers.
- A job seeker should register himself/herself in the system to obtain user & pass.
- The system should provide the ability for the job seekers to submit their resume.
- The system should provide the ability for the job seekers to follow their requests.
- The system inform the job seekers through an email when a job position found.

Required functionalities from hiring agencies:

- A hiring organization should register itself in the system to obtain user & pass.
- The system should provide the ability for the hiring organizations to submit their potential job vacancies.
- The system inform the hiring organization through an email when a job seekers found.

توجه:

۱- پروژه صرفا از طریق بخش تکالیف ارسال شود

۲- تیم ها تک نفره یا دو نفره می باشند.

۳- به پروژه هایی که از طریق ایمیل یا صندوق پیام ارسال شوند هیچ نمره ای تعلق نخواهد گرفت.
